About me

I'm a second year student. The sphere of my interests lays in telecommunications systems, developing driver devices and software. I'm a creative person liking to work in a team for a mutual result.

Education

2022 – 2023	FEFU University School Rosneft class
2023 – 2024	SESC NSU Physics and Mathematics class
2024 – 2025	MSU Faculty of Physics
2025 – 2028	MIPT Physics and Technology School of Radio Engineering and Computer Technology

Projects

Prometheus

Speleological flashlight with automatic brightness control. I developed an algorithm that controls the brightness of the flashlight based on the distance to the obstacle and the illumination of the room

Pigalicza

A computer game with joystick control and WiFi data transfer of player information to create a database. I worked with semaphores and interrupts

Verilog project

Developing, implementating and tasting a module which performs various arithmetic operations and transfers the results to a register.

Hard Skills

C
C++
Verilog
Tex

Additional courses

Architecture of computing systems
Sberbank

Extra-Curricular Activities

Sports	Engaged in speleology and sports tourism
Art	I'm a theater school graduator still performing on stage.
Education	Circuit design
Languages	Russian, English
